

Hydrite Committed to Production of Peracetic Acid

Hydrite Chemical Co., an integrated manufacturer and supplier of chemicals and related services, is pleased to announce its investment in a food-grade, state-of-the-art facility for peracetic acid (PAA) production in Waterloo, Iowa.

The new facility will allow Hydrite to produce a variety of concentrations of PAA that leave no residue. PAA is an essential product to the sanitation industry and the preferred product choice of customers. PAA is commonly used in the sanitation industry as a disinfectant and cleaner with a variety of applications.

Hydrite's unique formulations of PAA serve multiple markets and have multiple applications. The primary PAA markets are food sanitation and intervention chemistry for processing meat, poultry, and fish. Additionally, PAA has applications for processing vegetables and fruits as well as other non-food applications such as water treatment, healthcare, general industrial, and oil & gas.

Hydrite is a full-service supplier of PAA and actively works to secure and obtain regulatory approvals including USDA, FDA, EPA and FCNs (Food Contact Notifications). Hydrite works diligently to expand its product portfolio to produce unique formulations.

Hydrite provides fully integrated lab services designed to help solve the toughest formulation issues and provide professional reports detailing the results and solution recommendations.

Andrew Cameron, Vice President-Food & Energy, commented, "This is an excellent opportunity for Hydrite to offer our customers the best in food grade products. We are excited about the future of Hydrite and PAA production thanks to our new PAA production facility that allows us to provide our customers with the highest quality products that distinguish Hydrite from other PAA producers."

Hydrite has developed a reputation within the industry for providing the distinct combination of excellence in chemical manufacturing and distribution with the most comprehensive level of technical expertise available. To learn more, visit www.hydrite.com or call 262-792-1450.

About Hydrite Chemical Co.

Hydrite, a family-owned company established in 1929, is one of the largest independent providers of chemicals and related services in the United States. Headquartered in Brookfield, Wisconsin, Hydrite has a network of manufacturing facilities, warehouses, and laboratories located in Illinois, Wisconsin, Iowa, Indiana, California, and Texas with over 900 employees in 23 states. Hydrite owns and operates a private fleet of over 255 units including tractors, van trailers, tankers, and railcars.

Hydrite offers expertise in chemical distribution and manufacturing, food and dairy sanitation, organic processing, liquid sulfites, foam control, water treatment, and compliance management services.

With over 7,000 items in its product portfolio, Hydrite's dedicated chemists, engineers, and technical service staff have extensive knowledge and experience to solve the most challenging formulating problems. Hydrite has a strong commitment to quality and customer responsiveness, and offers superior products and innovative solutions.
