

AMMONIUM THIOSULFATE And Urea Ammonium Nitrate

Providing Creative Solutions

Larger Yield with ATS=TM and UAN

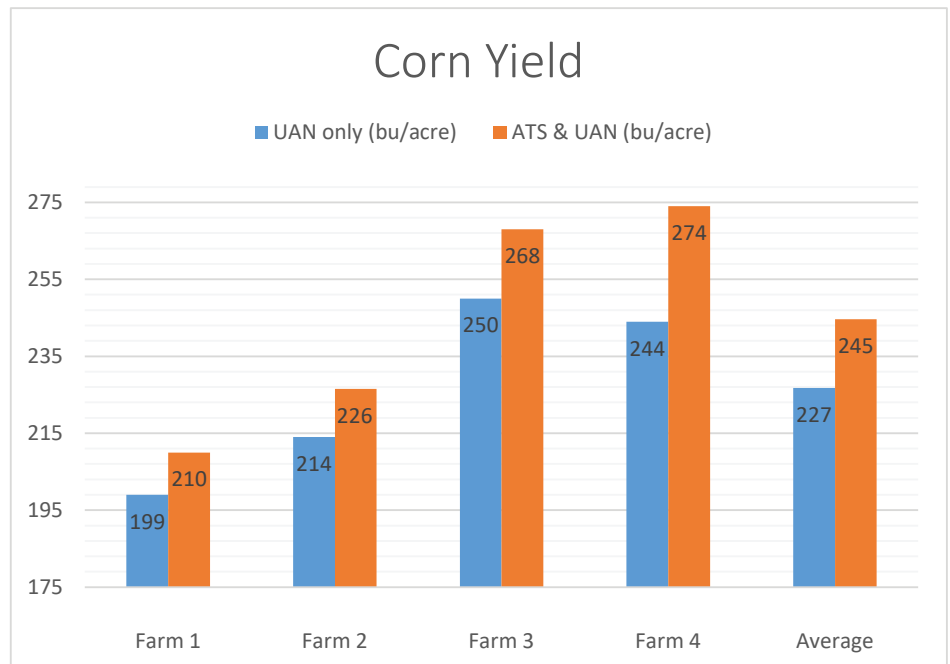

Increase your Return on Investment by using 28-0-0-5

FEATURES and BENEFITS

- Inhibits the nitrification process
- Slows the enzymatic breakdown of urea
- Contains readily available nitrogen and sulfur
- Thiosulfate is directly absorbed by the plant
- Can reduce the freeze point of UAN solutions to 0° F

Studies, in both academic and field, have shown that ATS=TM applied with UAN increase yield **10-20 bu/acre** over UAN alone.

That's an average return of investment of around **\$40/acre.**
