Agriculture

OUR DIFFERENCE

Supporting Stronger Crop Programs

Hydrite delivers more than crop inputs—we provide the technical expertise, supply reliability, and formulation flexibility agribusinesses need to compete and grow.

With decades of experience in chemical manufacturing and distribution, our team partners with agricultural retailers and distributors to deliver consistent, high-quality solutions backed by responsive support and deep industry knowledge. Our chemists and technical specialists work alongside your team to solve challenges, optimize performance, and support your customers across every season.

What Sets Hydrite Apart

- **Formulation Expertise**
  Custom blends and proven chemistries designed to perform across a wide range of agronomic systems and application methods.

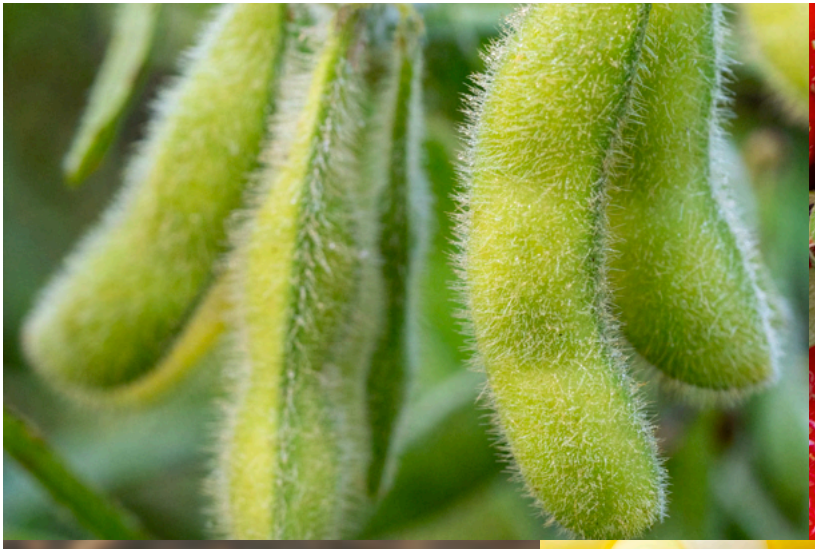

- **Technical Support That Goes Further**
  Field support, troubleshooting, and application guidance from experienced specialists—not just a product catalog.

- **Reliable Supply & Logistics**
  A strong distribution network and manufacturing footprint ensures product availability when and where you need it.

- **Quality You Can Trust**
  Consistent sourcing, rigorous quality control, and a commitment to delivering dependable performance.

- **Partnership Approach**
  We work as an extension of your team—helping you differentiate your offering and support your customers with confidence.

Thiosulfate Solutions

Essential Nutrients for Modern Crop Systems

Hydrite's thiosulfate portfolio offers flexible nutrient solutions designed to fit a wide range of crop fertility programs. With products that supply sulfur along with nitrogen, potassium, or magnesium, growers and retailers can select the right nutrient combination to meet their agronomic needs.

Why Thiosulfates?

Thiosulfates provide a highly available source of sulfur in liquid form, making them easy to handle, readily compatible with liquid fertilizer programs, and well-suited for a wide range of application methods.

Product Portfolio

- ATS=™ (Ammonium Thiosulfate)
- Thio 25-17™ (Potassium Thiosulfate)
- MTS=™ (Magnesium Thiosulfate)

Designed for Retailers & Distributors

- Consistent quality and compatibility across product lines
- Reliable supply during peak demand periods
- Technical guidance on blending and application positioning
- Made in the USA

Complete Ag Product Portfolio

A Comprehensive Portfolio to Support Your Full Agronomic Offering

Beyond thiosulfates, Hydrite provides a wide range of crop input solutions to help retailers and distributors deliver value across every stage of the season. Simplify your sourcing across multiple product categories with proven chemistries, helping your team sell with confidence.

Pop-Up Starters

- Promote early root development and emergence
- Compatible with in-furrow and starter programs
- Designed to enhance nutrient availability at planting

Foliar Nutrients

- Rapid nutrient uptake during key growth stages
- Flexible tank-mix compatibility
- Supports stress mitigation and crop performance

Micronutrients

- Address critical nutrient deficiencies (Zn, Mn, Fe, etc.)
- Chelated and specialty formulations for improved uptake
- Integrates easily into fertility programs

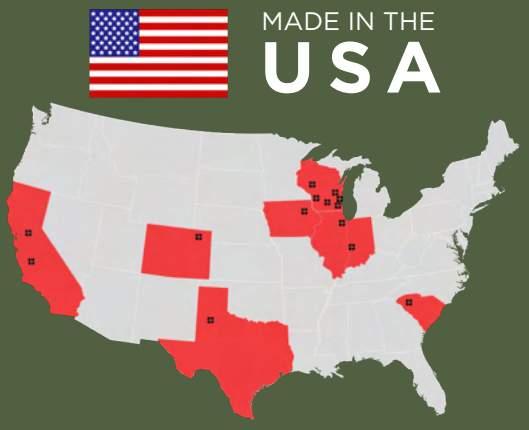

Manufacturing, Distribution & Expertise

Built to Support Your Business

From production to application—Hydrite delivers end-to-end capability. Combining manufacturing strength, distribution scale, and technical expertise enables us to support agricultural partners across the supply chain.

Manufacturing Capabilities

- Multi-site production with advanced chemical processing
- Flexible batch and continuous manufacturing
- Scalable capacity for seasonal demand
- Custom formulation and private label opportunities

Distribution Network

- Strategic locations across North America
- Bulk and packaged delivery options
- Reliable logistics to support peak season demand
- Inventory planning to reduce supply risk

Technical Expertise & Custom Solutions

From formulation to field performance—built to support your business. Hydrite combines deep technical expertise with flexible manufacturing capabilities to support agricultural partners across the entire product lifecycle. From formulation and lab validation to custom blending and field support, we help you deliver consistent, high-performing solutions to your customers.

- Product development, testing, and optimization
- Compatibility, stability, and performance analysis
- Field support and application guidance
- Toll blending, private label, and contract manufacturing
- Scalable production aligned with your supply chain
