

100% Ortho Starters

Hydrite's 100% Ortho Starters provide your operation many benefits compared to similar competitor offerings. The product ensures 100% of Phosphorus is readily available in all soil conditions including soil temperatures below 60°F, wet or dry conditions. 100% ortho provides the cleanest, safest, most efficient method of delivering plant nutrients with lower salt content and without the impurities and heavy metals found in polyphosphate based fertilizers. Because of this 100% ortho is more beneficial to soil biology. It has been designed for today's genetics for quick early start and uniform emergence with an added use as a foliar product.

KEY BENEFITS OF 100% ORTHO PHOSPHATE POP UP

- Plants use only ortho phosphates
- Immediately available phosphorus
- Lower viscosity for uniform flow rates over a wide range of temperatures
- Fewer contaminants to settle out
- 100% ortho - virtually no contaminants
- Excellent storability (no poly converting in tank before use)
- In furrow, seed safe, low salt
