

Product Line Card

Hydrite offers both antibiotic and non-antibiotic antimicrobial technology for fermentation, propagation, upstream and downstream ethanol processes.

Antibiotic Based (Fuel Ethanol Fermentation)

Enock v (Virginiamycin)

Virginiamycin based antimicrobial formulation designed to control contaminating bacteria by interfering with protein synthesis at the ribosomal level.

Enock P (Penicillin)

Single component antimicrobial that controls contaminating bacteria by inhibiting cell wall synthesis.

Enock 365 (Proprietary and Customizable Blend)

Combination of antibiotics that inhibit a broad range of both gram-negative and gram-positive fermentation contaminants. ENOCK 365 can be customized to a specific plant requirement.

Providing Creative Solutions
