

FOOD AND BEVERAGE

Hydrite offers a line of food processing products to cover a wide variety of needs for fruit & vegetable, meat & poultry, egg and dairy processing.

We provide solutions in the following:

1

SANITATION CHEMICALS

We have a comprehensive approach to cleaning and offer a full range of products, such as CIP cleaners, manual cleaners, acid and alkaline products, sanitizers, processing aids, and membrane cleaners.

2

FOOD INGREDIENTS

We are a single source provider of distributed dry ingredients and manufactured liquid chemical additives to food, industrial and manufacturing companies.

3

MEAT INTERVENTION CHEMISTRY

We carry approved (USDA and FDA), effective antimicrobial products to safely assist in fighting foodborne bacteria when applied to poultry and meat during processing.

4

FOAM CONTROL

We offer application solutions in fermentation, wet-corn milling, potato processing, dairy production, organic processing, protein extraction and candy processing.

5

PROCESSING AIDS

We supply products to assist with increased production throughput and increasing operational efficiencies.

6

WASTEWATER TREATMENT

We design a practical, creative strategy using a consultative problem-solving approach to optimize chemistry and reduce overall costs.

7

PRODUCTION CHEMICALS

We carry a wide range of products to ensure your production process is safe and running at maximum efficiency.

8

COMMODITY CHEMICALS

With over 7 million gallons of bulk storage and location throughout the Midwest, we are able to offer our customers commodity chemicals when they need them at the best price.
