

OPTIMAX HYDRIBLEND

We provide creative solutions to our customers. We respect the well-being of each employee, their plant's food safety, and initiatives focused on sustainability and environmental protection.

The Hydrite Optimax HydriBlend System is a weight-based make down system with advanced programming and system design for accurate blending and safe operation. Make down systems reduce operating costs and eliminate manufacturing costs on bulk caustic and acid products.

APPLICATIONS

- Bulk Caustic Products
- Bulk Chlorinated Alkaline Products
- Bulk Acid Products
- Bulk Membrane Alkaline Products

FEATURES AND BENEFITS

- Reduces freight delivery costs
- Delivers up to 4 locations
- Replicates product chemistry on site
- Includes PLC/ethernet communications with real-time data
- Program up to 20 different formulas
- WIFI remote access capabilities
- Blended product report and billing information
- Rugged stainless steel construction is built to last
- Safeguards built in programming
- Patent pending
