

Providing Creative Solutions

Industrial Chemical Tolling and Manufacturing

Tolling and Manufacturing

Products

Acid base neutralizations

Acid/Alkaline blending, dilution and packaging

Higher level corrosive handling

Biocide and preservative handling

Esterification

Solid to liquid conversions

Water and oil based emulsions

Pure and denatured alcohol blending

Specialty toll packaging

Personal care solutions

Surface cleaners

Limited flammable blending

INORGANIC BLENDING FACILITY MILWAUKEE, WI

Equipment

- (P01) Tech Area
 - 19 blend tanks: 1000 - 6000 gal.
 - 7 portable blend tanks: 90 - 350 gal.
- (P02) cGMP Area
 - 12 blend tanks: 700 - 10000 gal.
 - 4 portable blend tanks: 80 - 500 gal.
- (P03) Flammable Area
 - 1 tech flammable blend tank: 3350 gallons
 - 2 FG blend tanks: 6000 gallons

Specific Technical Capabilities / Utilities

- 2 tech homogenizers / 1 FG homogenizer
- FG bead mill
- 2 FG Silverson rotor/stator mills
- 2 FG portable tri-blenders
- FG Ross rotor/stator mill
- Chilled cooling water
- Bulk CO₂ & Nitrogen
- Multiple water types available (Potable, Soft, DI, USP)
- Low pressure steam (15 psig)
- Hot oil (2 P01 tanks / 1 P02 tank / 2 P03 tank)

Tolling and Manufacturing

Hydrite drivers drive about 6,000,000 miles per year and deliver more than 80,000 orders each year

VALUE-ADDED SERVICES

- > Technical service and development centers
- > Development and technical support staff
- > Compliance management services
- > Hazardous waste management programs
- > Air emissions inventories and Title V permitting
- > SPCC plans
- > SARA reporting
- > TSCA compliance plans
- > Quality control labs

Providing Creative Solutions

See the Hydrite advantage with an unsurpassed chemical distribution system. Our “Just in Time” inventory management and delivery network will reduce your operating cost. We maintain uncompromising standards, screening our suppliers through our demanding qualification program. The quality of all incoming materials is verified to assure it meets strict product specifications to give you the best quality. And we go beyond normal distribution, to offer custom compounding and reacting, special intermediate products and custom solvents blending.

Our investment in training, quality control, research, custom blending and manufacturing equipment allows you to feel comfortable knowing we do whatever we can to give you the best value for your chemical-buying dollar. Our commitment to supporting your needs is evident in our facilities which boast:

- 9 manufacturing locations with over \$53 million in total inventory
- 1,062,000 square feet of manufacturing and warehouse space
- 18.3 million gallons of storage, with 92 production vessels
- More than 8,000 products
- Private fleet of 90 power units and 376 tankers, trailers and rail cars
