# SAND MINE SOLUTIONS

### Offering Expertise in Mining

Hydrite Chemical Co. is a strategic partner to the sand mine industry with over 50 years of water treatment expertise.

**Technical Expertise** 

Innovative Science

Personal Attention

Our strength lies with the ever-expanding technical capacity of our staff and the decades of experience they bring to the table.

#### **Equipment and Instrumentation Solutions**

- Optimize chemistry to drive savings
- Remote monitoring
- Sludge density with alarming
- Turbidity monitoring and control
- Data collection and reporting
- Vendor managed inventory systems
- There are many avenues to optimize chemistry from instrumentation to specific polymer selection based on your specific site and quality of the geological deposit.

#### **Quality Products**

Custom blending, toll manufacturing, and industrial chemical distribution; along with 200 different polymers in our portfolio.

## Providing Creative Solutions

#### Benefits of Partnering With Hydrite

- Local warehousing for quick, cost effective deliveries.
- Extensive support utilizing Account Managers and Field Technicians.
- Routine service visits to help maintain optimal performance of chemistry.
- Access to Hydrite's Technical R&D & Regulatory Affairs personnel.
- Operator training for troubleshooting and chemical feed optimization.

#### 925 Employees in 23 States

Milwaukee, WI. O
Cottage Grove, WI. UI
La Crosse, WI. Te

Oshkosh, WI.
University Park, IL.
Terre Haute, IN.

Waterloo, IA. Lubbock, TX. Visalia, CA.

As your partner, we will examine your current chemistry and process, and recommend a cost reduction plan.
