

Water Treatment Solutions for Mining

Hydrite offers a broad range of water treatment technologies to help maintain optimal operations, meet water quality requirements and reduce overall costs. We provide on-site support, where our experienced team works alongside you to provide performance-oriented answers to your water treatment challenges. Partner with Hydrite to achieve more clean water at a lower cost.

Contact us today for a complimentary jar test and site trial to determine the best products for your process and application.

Hydrite's Areas of Expertise

Cost Reduction • Sand Dewatering • Mud Dewatering
Water Clarification • Automation • Diverse Product Line

Benefits of Partnering With Hydrite

- Local warehousing for quick, cost effective deliveries
- Extensive support utilizing Account Managers and Field Technicians
- Routine service visits to help maintain optimal performance of chemistry
- Access to Hydrite's Technical R&D & Regulatory Affairs personnel
- Operator training for troubleshooting and chemical feed optimization

Providing Creative Solutions

TRUSTED, TECHNICAL, AND DEPENDABLE

The Hydrite Advantage:

Technical Expertise | Manufacturing Capabilities and Flexibility
Quality Products | Innovative Solutions | Local Logistics

Product Offerings

- HydriFloc polymers designed to increase floc density, enhance clarity, improve settling characteristics and dewater sludge
- HydriClear coagulants designed to perform in a variety of difficult treatment conditions
- Dewatering Aids to accelerate moisture reduction
- Dust suppressants

Equipment and Instrumentation Solutions

- Turbidity monitoring and control
- Remote monitoring
- Optimize chemistry to drive savings
- Data collection and reporting

Additional Capabilities

- Industrial chemical distribution
- Custom blending
- Toll manufacturing
