

Biomist Power Sanitizing Systems

Areas of Use

- Dry ingredient processing areas
- Packaging equipment
- Feed and exit areas of cooking conveyor systems
- Electronics, keyboards, touch pads and monitors
- Slicing equipment, tools and cutlery
- Refrigeration coils
- Air ducts
- Forklifts
- Almost anywhere!

Benefits

- Biomist Systems eliminate the flammability of atomized, concentrated alcohol
- Heated CO₂ system will operate 24/7, provides continual spray over long periods of time
- Cylinders and valves are protected by stainless steel enclosures
- Accessories and options allow for uninterrupted decontamination
- Biomist reduces chemical consumption and waste
- Saves time and labor - no wiping or rinsing, no cross-contamination with dirty rags
- Biomist Formula D2 is non-corrosive and safe for sensitive equipment
- Biomist Formula D2 is bactericidal, virucidal, fungicidal and tuberculocidal
- Biomist Formula D2 complies with OSHA's Bloodborne Pathogen Standard
- Spray penetrates small cracks, crevices and areas beyond physical reach

Simply point, spray and walk away!
