

HydriPet™ VG 105

Coconut Glycerin

GLYCERIN IN PET FOOD

Glycerin plays an important role in the manufacturing of many pet foods. When used in sufficient quantities, glycerin binds enough water to slow the growth of mold in pet food applications.

HydriPet™ VG 105 is manufactured via hydrolysis and composed of the preferred natural coconut glycerin. Manufactured in the United States at a GMP food grade facility, HydriPet™ VG 105 is also approved for human consumption and meets USP specifications.

USES

- Humectant (Water Binder)
- Palatability
- Preservative
- Texture Modification
