

# Hydrite M3ASURE™

## For Odor Control

Hydrite M3ASURE is a cutting-edge odor control solution that helps industrial facilities **measure, monitor, and manage** odors with precision. Using advanced sensors, it detects odors in both liquid and gas phases while measuring H<sub>2</sub>S, pH, temperature, wind direction, and atmospheric conditions. Operating 24/7/365, M3ASURE proactively tracks odor sources and contributing factors, optimizes chemical use, enhances workplace environments, and supports compliance—all while strengthening community trust and reflecting Hydrite's commitment to **innovation** and **sustainability**.

### The M3ASURE Approach

- **Measure:** Achieve unmatched precision with advanced sensors to detect odors in both liquid and gas phases. M3ASURE measures H<sub>2</sub>S, ORP, temperature, pH, wind direction, and atmospheric conditions for comprehensive data.
- **Monitor:** Take control of odor management with real-time insights—track pond, unit operation, and atmospheric odors, analyze odor-generating factors, optimize chemical usage, and maintain seamless 24/7/365 operations without disruptions.
- **Manage:** Maximize efficiency, prevent odors proactively, and foster strong relationships within your community. Ensure compliance with environmental regulations, strengthen your brand through innovation and environmental stewardship, and create safer work environments. Leverage real-time insights for smarter decisions, reduced risks, and lasting public trust.

#### Measure

Key process indicators (KPIs) that add value to the customer

#### Monitor

KPIs to treat symptoms before they become problems

#### Manage

Costs and KPIs from anywhere, anytime

## Providing Creative Solutions

## Why Choose M3ASURE?

M3ASURE is the ultimate odor control solution, designed to integrate effortlessly with process scrubbers or ponds to eliminate H<sub>2</sub>S and nuisance odors. It safeguards your employees, reputation, and community harmony, enabling worry-free operations.

## Industries That Benefit

Rendering

Sugar Processing

Oil & Gas

Wastewater Treatment

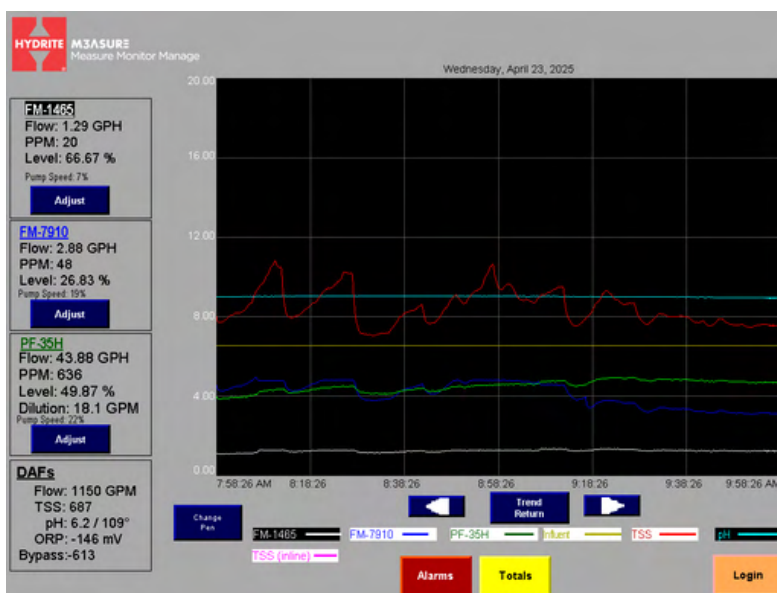

Pulp & Paper

Food & Beverage

Hydrite M3ASURE is tailor-made for industries facing odor and H<sub>2</sub>S challenges, including:

- **Rendering:** Effectively manage emissions from animal by-product processing.
- **Sugar Processing:** Control odors during refining and production.
- **Oil and Gas:** Address H<sub>2</sub>S risks and odors in extraction and refining.
- **Wastewater Treatment:** Optimize odor control for ponds and processes.
- **Pulp and Paper:** Manage nuisance odors from pulping operations.
- **Food and Beverage:** Ensure odor control to protect product quality and community goodwill.
